About Me

```
name: "Giritharan S"
role: "Final-Year CSE Student · Aspiring Cloud & IT Support Engineer"
location: "Cuddalore, Tamil Nadu, India"
focus: ["Cloud Support", "IT Service Desk", "Full-Stack Engineering (Django)"]
```

I'm a final-year **Computer Science Engineering** student building practical, enterprise-style web applications with **Python, Django, MySQL**, and cloud fundamentals. My core interest lies in **IT infrastructure, service desk operations, and cloud support engineering** — bridging the gap between clean application code and reliable, well-run systems.

I currently lead development of **CloudOps Hub (NexDesk)**, a full-stack Smart IT Help Desk and Asset Management System, and have hands-on internship exposure to frontend engineering and DevOps deployment workflows.

✈️ Open To:

- IT Support Engineer / Service Desk Analyst roles
- Cloud Support Engineer (AWS / Azure) opportunities
- Full-Stack Developer roles (Python / Django)
- Entry-level, remote or on-site placements

🟣 Tech Stack

Languages

Frontend

Backend & Databases

Cloud, DevOps & Tooling

● **Cloud & IT Support Expertise**

<div align="center">

Domain	Proficiency	Details
Cloud Computing Fundamentals		Core concepts, service models, AWS & Azure basics (NPTEL certified)
IT Service Desk / ITSM		Ticketing workflows, SLA monitoring, asset lifecycle tracking
Linux & Networking		Linux fundamentals, networking basics, REST API concepts
DevOps Workflows		Deployment pipelines, server runtime provisioning
Django / Backend Engineering		REST Framework, MySQL integration, role-based dashboards

</div>

● **Featured Projects**

<details> <summary>☁️ CloudOps Hub (NexDesk) – Enterprise IT Help Desk & Asset Management System</summary>

A full-stack ITSM application replacing legacy support workflows with a centralized ticketing platform — featuring role-based dashboards, an SLA engine, smart ticket categorization, and asset lifecycle tracking.

Attribute	Details
Stack	Django · MySQL · HTML/CSS/JavaScript · Git/GitHub
Scale	Multi-role dashboards (Admin / Technician / End-User)
Performance	Optimized ticket queries with SLA breach alerts

Attribute	Details
Security	Role-based access control, session-based auth
Impact	Streamlines IT ticket resolution and asset tracking
Repository	View Source

Built as a capstone project, with **Azure integration** scoped for a future release.

</details>

<details> <summary> Green Eye — Smart Waste Reporting Platform</summary>

A civic-tech crowdsourcing application enabling citizens to upload geotagged images of waste issues, alerting municipal crews to coordinate cleanups efficiently.

Attribute	Details
Stack	Python · HTML/CSS/JavaScript
Scale	Citizen-facing civic reporting tool
Performance	Lightweight image + geolocation upload flow
Security	Input validation on report submissions
Impact	Improves municipal waste-response coordination
Repository	View Source

</details>

<details> <summary> Travel Alarm — Smart Navigation Alert System</summary>

A web-based geolocation tracker using Leaflet.js mapping and real-time navigation alerts to sound an audio alarm before reaching a specific destination.

Attribute	Details
Stack	Leaflet.js · Geolocation API · Howler.js
Scale	Single-user real-time tracking web app

Attribute	Details
Performance	Live location polling with low-latency alerts
Security	Client-side geolocation permission handling
Impact	Prevents missed stops during travel
Repository	View Source

</details>

<details> <summary> Thrift Pannuvom — Online Thrift Store & Venture</summary>

An entrepreneurial online resale brand managed end-to-end, covering clothing curation, pricing, inventory optimization, and digital marketing.

Attribute	Details
Stack	E-commerce Operations · Marketing Strategy
Scale	Independent venture, self-managed operations
Performance	Inventory turnover optimization
Security	N/A (business venture)
Impact	End-to-end brand ownership and client engagement
Repository	View on LinkedIn

</details>

Experience

Full Stack Developer Intern · NexGen Software Institute

Internship

Designed and built high-performance responsive interface layouts using HTML5, CSS3, and modern JavaScript.

- Optimized frontend interactions and page load behavior
- Fixed cross-browser layout inconsistencies

- Directly contributed to improving overall end-user experience

HTML5 CSS3 JavaScript Responsive Design

DevOps Intern · Twilight IT Solutions

Internship

Gained foundational knowledge of standard DevOps architectures and deployment practices.

- Set up hands-on deployment workflows
- Provisioned server runtimes
- Built and deployed a real-time tracking project

DevOps Deployment Server Provisioning

Digital Marketer · Caprix Media

Campaign Management

Handled and optimized multiple client campaigns end-to-end.

- Designed targeted search and social campaign configurations
- Drafted copywriting and brand content
- Coordinated directly with client stakeholders on performance parameters

Digital Marketing Campaign Strategy Client Communication

● Current Focus

Learning:

- Cloud Architecture (AWS & Azure fundamentals)
- Advanced Django REST Framework
- IT Service Management (ITSM) best practices

Building:

- CloudOps Hub – Smart IT Help Desk & Asset Management System

Exploring:

- DevOps deployment pipelines
- Networking & Linux system administration

Open To:

- IT Support Engineer / Service Desk Analyst roles
- Cloud Support Engineer opportunities
- Full-Stack Developer (Django) positions
